INTRODUCTION

The survey results described in this tabular analysis are based upon interviews conducted by telephone with 1,501 adult New Jersey residents who were randomly selected. Interviews were conducted between Decembers and 14, 1986,

The analytical report on survey findings is contained in Volume I of this study.

TABLE OF CONTENTS

<u>Questions</u>	<u>Table</u>
1 How many years have you lived in New Jersey?	1
2 How many years have you lived in your town or city?	7
3 How would you rate New Jersey as a place to live? excellent, good, only fair, or poor	13
4 How would you rate your town or city as a place to live? excellent, good, only fair, or poor	19
5 In the next 5 to 10 years do you expect New Jersey to become a more attractive place to live, a less attractive place to live, or don't you expect it to change very much?	25
6 In the next 5 to 10 years will your city or town become a more attractive place to live, a less attractive place to live, or don't you expect it to change very much?	31
1 7 In what ways do you expect your town or city to become a more attractive/less attractive place to live?	37
I 8 What are the things you <u>like best</u> about living in your community?	43
1 9 What are the things you like least about living in your community?	49
1 10 Please tell me how important the following is to your satisfaction with living in a community?	
A. The amount of local crime	55
I B. The local tax rates	61
C. The quality of local schools	67
D. The amount of traffic	73
I E. Availability of local outdoor recreational areas	79
F. Availability of employment opportunities	
G. Access to cultural and social activities	
I H. Cost of housing	97
I. Access to stores for day to day shopping	
J. Reasonably clean natural environment	
§ K. Access to public transportation	115
I L. The physical appearance of the community ..	121

TABLE OF CONTENTS

Questions

Table

11	How would you rate your community on each of the following characteristics?	
	A. The amount of local crime	127
	B. The local tax rates	133
	C. The quality of local schools	139
	D. The amount of traffic	145
	E. Availability of local outdoor recreational areas	151
	F. Availability of employment opportunities	157
	G. Access to cultural and social activities	163
	H. Cost of housing	169
	I. Access to stores for day to day shopping	175
	J. Reasonably clean natural environment	181
	K. Access to public transportation	187
	L. The physical appearance of the community	193
12	Do you think growth and development will have an important effect on the following?	
I 199	A. The amount of local crime? Will it increase or decrease?	
	B. The local tax rates? Will it increase or decrease?	205
	C. The quality of local schools? Will it result in higher quality schools or lower quality schools?	211
	D. Traffic congestion? Will it result in increased or decreased traffic congestion?	217
	E. Availability of local outdoor recreation? Will it decrease the availability of local outdoor recreation?	223 it increase or
	F. Availability of employment opportunities? Will it the availability of employment opportunities?	229 Increase or decrease
	G. Access to cultural and social activities? Will it increase or decrease access to cultural and social activities?	235
	H, The cost of housing? Will it increase or decrease the cost of housing?	241
	I. Access to day-to-day shopping? Will it increase to day-to-day shopping?	247 or decrease access
	J. The cleanliness of the environment? Will it result in an environment that is more clean or less clean?	
	K. Access to public transportation? Will it increase or decrease access to public transportation?	259
	L. The physical appearance of the community? Will it make the physical appearance of the community more attractive or less attractive?	265

Continued ..

TABLE OF CONTENTS

Questions	Table
13 Is development in your city/town making your community a better place to live, a worse place to live, or doesn't it make a difference?	271
14 If you had the power to decide, would you like to see development occur more in the cities, more in suburban areas, or more in rural areas?	• 277
15 Do you think it is or is not possible to make a major improvement in the quality of New Jersey's main cities?	283
16 How do you feel about the concentration of growth and development in major highway corridors? Do you think it is a good thing or a bad thing?	289
17 How important to you personally are the natural areas of New Jersey. Are these places very important, somewhat important, not too important, or not at all important to you?	295
18 To what extent do you think the state's natural areas are threatened by increasing growth and development?	301
19 How strict do you think the current controls and standards for growth and development are in New Jersey using a scale from one to five, where 1 is not very strict and 5 is extremely strict?	307
20 How strict do you think the controls and standards for growth and development should be in New Jersey, using the same scale from one to five where 1 means not very strict and 5 means extremely strict?	313
21 Some people feel that growth and development should be controlled at the local level because towns and cities ought to have the right to encourage or discourage growth and development within their borders; other people feel that because growth and development in one community often has an effect on neighboring communities, growth and development ought to be controlled at the regional level. Which view comes closer to your own?	319

Further Dissemination Outside Subscribers' Organization By Any Method Or In Any Form Is Prohibited

Banner Definitions The following definitions apply to

banner points displayed in the tabular analysis,

Rate of Growth

This is the percentage annual increase in households from 1980 projected through 1991 within zip codes.

Low = Under 1.5% annual increase
Medium = 1% - 1.9% High = 2% or more

Stringency of Control on State Growth and Development

This consists of two measures of the respondents' assessment of the stringency of development controls as rated on a 5 point scale where 1 is "not very strict" and 5 is "extremely strict". The first measure is for current controls and the second is for the preferred strictness of control.

The stringency score is a composite of the two measures derived by subtracting each respondent's rating for current controls from the rating given regarding preferred controls. Thus, the higher the score the greater the difference between the assessment of the status quo and the preferred level of control. For example, a "1" or "not very strict" for current controls subtracted from a "5" or "extremely strict" as the desired level of control would result in a score of "4".

The columns marked "not strict" or "less strict" are based on ratings of 1,2, or 3 for the corresponding question. Those marked "very strict" or "more strict" are based on a rating of 4 or 5

Areas

Respondents have been categorized according to their residence zip code into nine areas of the state. These areas are defined primarily by counties or portions of counties, as described below:

North Newark .

Bergen

Hudson

Essex

Union

Passaic (Pompton Lakes and South)

Middlesex (North of the Raritan River)

Route 80

Morris

Passaic (North of Pompton Lakes)

Sussex

Warren (White, Oxford, and Mansfield and north)

Route 78

Warren (South of White, Oxford and Mansfield)

Hunterdon (except the Amwells and Lambertville)

Somerset (North of Hillsborough)

Central Route 1

Somerset (Hillsborough and South)

Hunterdon (Amwells and Lambertville)

Mercer

Middlesex (South of the Raritan River and west of South River and Old Bridge)

Monmouth (Roosevelt and west)

Burlington (Bordentown area)

North Coast

Middlesex (Old Bridge, South River, South Amboy, Sayreville)

Monmouth (except Roosevelt and west)

Toms River

Ocean (except Tuckerton area)

Areas (cont'd)

South Camden

Camden

Gloucester

Burlington (except Bordentown area)

Atlantic City

Atlantic

Ocean (Tuckerton area)

Cape May (Ocean City area)

Cape May

Cape May (except Ocean City area)

Cumberland

Salem

SAMPLING TOLERANCES

In interpreting survey results, It should be borne in mind that all sample surveys are subject to sampling error, that is, the extent to which the results may differ from what would be obtained if the whole population surveyed had been interviewed. The size of such sampling errors depends largely on the number of interviews conducted.

The following tables may be used in estimating the sampling error of any percentage in this report. The computed allowances have taken into account the effect of the sample design upon sampling error. They may be interpreted as indicating the range (plus or minus the figures shown) within which the results of repeated samplings in the same time period could be expected to vary, 95 percent of the time, assuming the same sampling procedure, the same interviewers, and the same questionnaire.

The first table shows how much allowance should be made for the sampling error of a percentage:

Recommended Allowance for Sampling Error
of a Percentage

In Percentage Points (at 95
in 100 confidence level)*

	1500	1200	1000	75	65	55	50	40	30	25	10
Percentages near 10											
Percentages near 20				0	0	0	0	0	0	0	0
Percentages near 30											
Percentages near 40	2	2	2	3	3	3	3	3	4	4	7
Percentages near 50											
Percentages near 60	2	3	3	3	4	4	4	5	5	6	9
Percentages near 70	3	3	3	4	4	4	5	5	6	7	11
Percentages near 80	3	3	4	4	4	5	5	6	6	7	11
Percentages near 90	3	3	4	4	4	5	5	6	7	7	11
	3	3	4	4	4	5	5	6	6	7	11
	3	3	3	4	4	4	5	5	6	7	11
	2	3	3	3	4	4	4	5	5	6	9
	2	2	2	3	3	3	3	3	4	4	7

* The chances are 95 in 100 that the sampling error is not larger than the figures shown.

The table would be used in the following manner: Let us say a reported percentage is 33 for a group which includes 1500 respondents. Then we go to row "percentages near 30" in the table and go across to the column headed "1500". The number at this point is 3, which means that the 33 percent obtained in the sample is subject to a sampling error of plus or minus 3 points. Another way of saying it is that very probably (95 chances out of 100) the true figure would be somewhere between 30 and 36, with the most likely figure the 33 obtained.

In comparing survey results in two samples, such as, for example, men and women, the question arises as to how large a difference between them must be before one can be reasonably sure that it reflects a real difference existing in the population under study. In the tables below, the number of points which must be allowed for in such comparisons is indicated.

Two tables are provided. One is for percentages near 25 or 75; the other for percentages near 50. For percentages in between, the error to be allowed for is between those shown in the two tables:

Recommended Allowance for Sampling Error
Error of the Difference-Between-Two Samples

In Percentage Points
(at 95 in 100 confidence level)*
TABLE A

Size of Sample	<u>Percentages near 25 or percentages near 75</u>					
	750	650	550	400	300	100
750	5					
650	5	6				
550	6	6	6			
400	6	6	7	7		
300	7	7	7	8	8	
100	11	11	11	11	11	1

* The chances are 95 in 100 that the sampling error is not larger than the figures shown.

Recommended Allowance for Sampling Error
of the Difference Between Two Samples

In Percentage Points (at 95 in
100 confidence level)*

TABLE B

Size of Sample	Percentages near 50					
	750	650	550	400	300	100
750	6					
650		6				
550			7			
400				8		
300					9	
100						10

Here is an example of how the tables would be used: Let us say that 50 percent of men respond a certain way and 40 percent of women respond that way also, for a difference of 10 percentage points between them. Can we say with any assurance that the 10-point difference reflects a real difference between men and women on the question? Let us consider a sample which contains approximately 750 men and 750 women.

Since the percentages are near 50, we consult Table B, and since the two samples are about 750 persons each, we look for the number in the column headed "750" which is also in the row designated "750". We find the number 6 here. This means that the allowance for error should be 6 points, and that in concluding that the percentage among men is somewhere between 4 and 16 points higher than the percentage among women we should be wrong only about 5 percent of the time. In other words, we can conclude with considerable confidence that a difference exists in the direction observed and that it amounts to at least 4 percentage points.

If, in another case, men's responses amount to 22 percent, say, and women's 24 percent, we consult Table A because these percentages are near 25. We look in the column headed "750" and see that the number is 5. Obviously, then, the two-point difference is inconclusive.

* The chances are 95 in 100 that the sampling error is not larger than the figures shown.

INTRODUCTION: Hello, I'm _____ calling from The Gallup Organization in Princeton. May I please talk _____ to the youngest male 18 years of age or older who is at home? **IF NO MALE, ASK:** May I speak to the oldest female 18 years of age or older who is at home?

We are conducting a survey of New Jersey residents and would like to include your views.

- To begin with, how many years have you lived in New Jersey?
- How many years have you lived in your town or city?

	%	Q.1 NJ	%	Q.2 Town/City
Less than 1	1	1[]	6	1[]

} SKIP TO Q.8

CARD 1 IF

MORE OR LESS ATTRACTIVE ('1 OR 2') IN Q.6, ASK Q.7, OTHERS GO TO Q.8

7. In what ways do you expect your town or city to become a more attractive/less attractive place to live?

y[]Don't know

ASK EVERYONE:

8. What are the things you like best- about living in your community?

9. What are the things you like least about living in your community?

CARD 1

10. Now I am going to read you a list of things that can affect one's satisfaction with living in a community. Without referring to any particular community, please tell me how important each of these things is to you on a scale from 1 to 5, where 1 means not at all important and 5 means very important.

11. Next, using the same scale of 1 to 5, how would you rate your community on each of the previously mentioned characteristics? This time a 5 represents

an excellent rating and a 1 represents a poor rating. First how would you rate (READ LIST. START AT "X")
